Turf Guard™ Wireless Soil Monitoring System

Note: Toro is sunsetting the Turf Guard product line in 2025.

Parts will continue to be available until 2027

FEATURES & BENEFITS

Reduce Water Usage and Improve Playability
Monitor moisture levels and adjust irrigation without risking turf quality. Promote root growth by avoiding over watering. Detect dry areas before they impact the turf's health.

100% Wireless Network
No wires between the repeaters and the sensors, or the sensor and the probes means that sensors can be installed anywhere on the course without disrupting play. Install sensors without having to trench or pull wires.

Take the Guesswork out of Managing Salinity
Track salt build-up and schedule flushing as needed. Get positive confirmation that you're flushing reduced soil salts. Know when and how much water to flush with.

MTI's Toro® Circuit Board Exchange Program

The Circuit Board Exchange Program Provides:

• Immediate replacement • Low, standard-cost pricing • Two year warranty on all replacement units

For Circuit boards listed below, just take them to Brooklyn Center location for an over-the-counter exchange. Pay the board price for replacement. If you do not have the board to exchange, please add the core charge, and that will be credited back when returned.
